Public Observing Night at Mosquito Hill Nature Center

Wednesday, July 16th

Monthly Meeting

Barlow Planetarium - "Bob Peterson - Things to look at in the night sky"

Club News:

Hi All, It's been an interesting month for observing, started out slow with all the storms in June but early July has been fantastic.

had a good time out at ertle road with the group. had a nice display of 4th of July fireworks from the towns in the area, after that real clear skies and no Dew! saw a nice fireball Saturday night. I reported it to the American meteor society after one of our members suggested it. the form was easy to fill out. I hope to get feed back. this will make a good topic at our meeting.

next month the big starpartys get fired up! I can't wait for the details. alot of members are going to northwoods and prairie sky's starparty's.

see you at the meeting, Jon McKenzie

p.s. I traded shifts to attend the meeting.
